

PRESS RELEASE: SUSINCHAIN 3rd Governing Council meeting was held on 4th October 2022 in Roeselare, Belgium

SUSINCHAIN consortium at the Governing Council meeting in Roeselare, Belgium

The 3rd SUSINCHAIN Governing Council meeting took place in 4th October 2022 in Roeselare, Belgium and was hosted by INAGRO. This annual meeting aims to provide updates regarding the SUSINCHAIN Project. During the day partners have discussed the current status of the SUSINCHAIN project and progress on each Work Package's activities. Partners have also discussed next steps and the strategy for the last year of the project implementation. This meeting was organized as a hybrid event and was attended by the advisory board members (both physically and online) which provided relevant feedback on the progress reports and advice for strategic project's decisions.

On the 5th October, INAGRO organized a visit to their own insect breeding and aquaculture facility as well to their greenhouse facility, AGROTOPIA, for the SUSINCHAIN project partners. It was a great opportunity to gain more knowledge about the production and research process.
